

## AGENDA ITEM #9.5

# REPORT TO CITY COUNCIL

Report Prepared by: Tim Houle

---

Date: February 2, 2016

Subject: Haul Roads - Anderson Brothers and Akerson Road

Report: At a previous City Council meeting, Mike Loven summarized the potential of Mathiowetz Construction and their suppliers and sub-contractors (e.g. Anderson Brothers) needing to haul material (earth, aggregate, concrete, bituminous, etc.) over City streets. The City does not have a formal policy and situations like this are reviewed on a case-by-case basis (e.g. maintenance, repairs, etc.). MnDOT has mentioned to Mathiowetz that they might want to start looking at the haul roads they, their suppliers, and their sub-contractors are planning to use and start coordinating with local road authorities as necessary.

When Mathiowetz contacts the City, we could have the Highway 371 City Coordination Team review their plans and present them to the Council at a future meeting.

Council Action Requested: No Council action requested.
