

**AGENDA ITEM #9.3**

**REPORT TO CITY COUNCIL**

**Report Prepared by: Jason Gorr – Public Works Director**

---

**Date:** February 5, 2019

**Subject:** Rasmussen Road Project

**Report:** As a follow-up to the Special City Council Meeting on January 22nd, it was understood the Council would entertain a proposal for Rasmussen Road improvements to the block north of Main Street and two blocks south of Main Street. As was mentioned, storm drainage improvements for these three blocks would probably extend beyond the initial street improvements.

Tim Houle anticipates providing and reviewing a draft proposal with the Council, most likely with a step-by-step approach in looking at storm drainage first and then street improvements. Hopefully this draft proposal will help with clarifying the components to be included in a finalized proposal to be presented for approval at the March City Council Meeting.

**Council Action Requested:** Council discussion and direction on the components to be included in a proposal for the Rasmussen Road Project.
